

Surrey & White Rock environment & business awards

Nomination *deadline*:
August 5, 2026

About the Awards

The Surrey & White Rock Environment & Business Awards recognize businesses and organizations in Surrey and White Rock – or members of the Surrey & White Rock Board of Trade – that are leading the way in environmental responsibility and innovation. These awards celebrate those who demonstrate outstanding commitment to sustainability and environmental stewardship. Recipients may be recognized for:

- Implementing impactful recycling or waste reduction initiatives
- Advancing environmental awareness and education in the community
- Driving innovative ecological research and environmental technologies
- Building partnerships that promote environmental responsibility and sustainable practices

Through these awards, we honour businesses that not only succeed in their industries, but also make meaningful contributions to a greener, healthier, and more sustainable future.

Criteria

- Nominees must represent a business or organization located in Surrey or White Rock, or be a SWRBOT member
- Elected officials are not eligible to apply
- Previous winners of the award may not be nominated again for a three year period

Questions

This application must be complete, signed and submitted with all questions answered in a separate document.

1. How many employees does your business have? Please include full time, part time and contractors required to run your business.
2. Provide a brief description of the project or initiative.
3. Describe how consideration of the environment is part of the business/organization's corporate philosophy and practice.
4. Provide qualitative results that demonstrate a positive impact on the environment.
5. Why do you believe that this business/organization should receive a Surrey & White Rock Environment & Business Award?
6. Describe how the business/organization and its products or services contribute to a circular economy.

What is a circular economy?

A circular economy is a systemic approach to economic development designed to benefit businesses, society, and the environment. It is a systems solution framework that tackles challenges like climate change, biodiversity loss, waste, and pollution. The concept of a circular economy helps to transform every element of our take-make-waste system: how we manage resources, how we make and use products, and what we do with the materials afterwards.

Certification

I, _____, the nominee/authorized signatory, have reviewed this nomination form and confirm the information to be true, and am aware that some information may be used in the promotion of the 2026 Surrey & White Rock Environment & Business Awards.
